CAREER SUMMARY:

I am a positive and competent Freelancer who specializes in Blockchain and Web Development. Over the years, I have contributed to some projects and I've honed my skills in the following programming languages, technologies and tools

TECHNICAL SKILLS:

- **Programming Languages:** JavaScript, TypeScript, PHP, Solidity, Python.
- **Frontend Technologies:** React & React Native, Next.js, Vue.js, Nuxt.js, Svelte, Redux, Jotai, Blockchain, Tailwind, ChakraUI, MaterialUI, JQuery, SCSS/SASS etc.
- **Backend Technologies:** Node.js, Express, NestJS, Blockchain, FastApi, Websockets, Firebase & Supabase.
- **DevOps:** Azure, Heroku, Docker, Digital Ocean, Git, Linux, Netlify & Vercel.
- **Databases:** MongoDB, MySQL, Redis, PostgreSQL, Firestore & Supabase.
- **Others:** Accessibility, Security, Quality Assurance and Process Automation, Algorithm & Data Structures, RestAPI, GraphQL, Manticore.

WORK EXPERIENCE:

Dehub.io

Web Developer | 15 December, 2023 – 2025

- Architected and implemented the React frontend and Node.js/Express backend, then led the migration to Next.js and NestJS for server-side rendering, improved modularity, and enhanced maintainability.
- Developed, tested, and deployed upgradeable Solidity contracts on Ethereum, Arbitrum, Polygon, Base, and BSC—including proxy patterns, staking modules, and access-control logic.
- Designed and deployed a Graph Protocol subgraph to index token events, transactions, and stream-contract metadata; synchronizing on-chain data with MongoDB to power real-time user-holding dashboards.
- Integrated Web3.js/Ethers.js and other libraries and helpers to enable wallet connections, on-chain reads/writes, and real-time event monitoring.
- Acted as lead developer—mentoring junior engineers, coordinating cross-functional sprints with designers and QA, and driving roadmap execution to meet aggressive launch timelines.
- Built WebSocket-based modules for live chat and notification streams, ensuring <100 ms update delivery.

Sailboat Labs | Contract

Backend developer | 04 February, 2024 – February, 2025

- Developed a Node.js script that reads company PDFs, extracts structured data, and automatically augments it with targeted online research and AI to generate key insights and proper report.
- Engineered bots that let users generate custom stickers on ExpressionZ and deploy them directly to their Telegram account or Discord server.
- Assisted in integrating both chatbots into the main ExpressionZ web application—synchronizing sticker-management features across platforms.

- Served as a secondary backend developer on spok.vc microservices architecture, refactoring REST endpoints and collaborating on the Vite+React frontend to deliver new features and performance improvements.
- Assisted in migrating the frontend to Next.js and rearchitecting the backend on structured Firebase; also ensured seamless integration with existing services.
- Worked in a cross-functional team using Jira for sprint planning, ticket tracking, and release management—ensuring clear communication and on-time delivery of features.

Ajjan Labs | Part time

Fullstack Developer | September, 2022

- Spearheaded the overhaul of system architecture, implementing a robust and efficient framework using Nest.JS.
- Built user-focused interfaces using technologies like React.js, Next.js and ChakraUI.
- Actively collaborated with software engineers, product managers and designers contributing to effective development.
- Acted as the primary backend developer for a clothing shop app.

10.8.8 Africa | Part time

Fullstack Developer | September, 2021

Fivepoints | Part time

Developer | 2018 – 2020

Freelancer | Part time

Frontend web designer and Graphics designer | 2015 – 2017
